Iverton SOW STANDARD & the MINER

SILVERTON'S PTONEER NEWSPAPER SINCE 1875

Silverton Standard established 1889

IN BRIEF

Colorfest Quilt Show set for Sept. 10-11 at Silverton Town Hall

Silverton Threads will be hosting its annual Colorfest Quilt Show and Sale on Saturday, Sept. 10 and Sunday Sept. 11, at Town Hall

Quilts will be displayed in the large meeting room upstairs and vendors will be on the main floor.

Items will be judged by a three-person committee headed by local quilter Barbara Kramer-Green, with the assistance of two quilters from out of town. Ribbons will be placed on the winning pieces for the public to enjoy ahead of the show's opening.

EPA seeking public input

The Environmental Protection Agency and the Colorado
Department of Public Health & Environment are hosting two sessions next week to accept informal public input on what should be done about mining impacts to portions of Upper Cement Creek.

Weekly Miner

established 1875

Staff from EPA and CDPHE

Listening sessions, field trip focus on Cement Creek water-quality woes

will be on hand to listen to ideas and to answer questions about cleanup options, including the Superfund program.

"We want to hear from you," said Jennifer Lane, EPA commu-

nity involvement coordinator.

"Please stop by to ask questions, provide comments and share your ideas."

Lane said there are three ways to provide input:

- Stop by the Miners Union-Hospital on Snowden Street to share your thoughts Wednesday, Sept. 14, from 2:30 to 7 p.m.
- Stop by at Stellar Bakery & Pizzeria to share your thoughts following a tour of Upper Cement Creek on Friday, Sept.

THE WORLD AS A CLASSROOM

The perfect convergence of all se factors happening at once ilts in an amazing phenome-. Mushrooms, or fungal res, start popping up in meadcapsular plant life on display ill to openly gaze at, and even

all over the mountains. Yes, each out and touch. No, I'm not talking about the lel Grateful Dead fans feed n in profuse amounts, but the of fungal spores you can ally eat and not get violent leasant) flashbacks of your h. The type of mushroom if you happen to munch on v, doesn't result in multiple to the porcelain throne, or gency trips to your local ital ICU unit. Edible mushis that one can be freely ed in the forest? That taste y darn good if prepared in he right way? Yes, indeed, hopper.

nother interesting phenomalso takes place in conjuncwith this explosion of forest . This one somewhat more erious in nature, and a comtransformation of character e part of the individuals it ens to — covert, or hidden room hunting sites. u may be asking yourself, would anyone who likes to for mushrooms try to keep arious locations of these capplants such a guarded ? One very simple reason, ear Watson. Most serious room hunters strongly want p desirable round cap locaa secret because these sites ch magical places. eather ingredients have con-Lin just the right amounts

se precise spots, and the

their part didn't-vary too much either. They'd look at me somewhat suspiciously (after all, I've always enjoyed hunting for fungal spores too), then with a guilty look painted all over their faces. state quite sheepishly that they were just out enjoying the beauty of nature that day. Of course they were. In addition to that, I know of some prime beachfront property for sale at an unbelievably cheap price on the coast of Greenland.

I'd inevitably return to my forest jaunt using the lame excuse that if I stood there for too long my muscles would get sore, while the parties I'd just run into would try mightily to figure out new and innovative ways to hide the fact that they'd just run into me. Three days later, both parties would return to said site looking for further evidence of new fungal displays, and neither of us would mention anything about the inconvenient encounter of the previous week.

The secret magic spot had been discovered, and now everybody felt about like the natives did a few hundred years after Columbus had planted his flag on their shores.

Another convenient way to hide the location of these secret spots is to circumvent the entire mushroom hunting process from the very beginning. Nip things in the bud as it were. A sizable number of locals I know quite frequently go out on extremely covert hunting expeditions. Trying desperately to hide the fact that they've even driven their car once since their last weekly church attendance. This strategy has been known to work extremely effectively.

David Swanson is a resident of Silverton.

Please Join Us to Tour Remediated Mine Sites in **Mineral Creek & Cement Creek Drainages**

The Animas River Stakeholder Group is sponsoring an all day tour of remediated mine sites in the Mineral Creek and Cement Creek drainages, Friday, September 16th. The tour will also include a look at areas in the Gladstone area where water quality has deteriorated in the past several years. Since 1994, the Animas River Stakeholders Group has worked to improve water quality in the Animas Basin through a collaborative approach involving all interested parties.

What: Tour of Remediated Mines Sites in Mineral Creek

& Cement Creek Drainages

When: 8:30 am to 3:30 pm Friday, September 16th

Where: Upper Cement Creek

Interested? Please contact Peter Butler at 970-259-0986 or butlerpeter2@gmail.com if you would like to attend so efforts can be made to coordinate transportation. The group is looking for volunteers with four-wheel drive vehicles with short wheelbases. The tour will begin at the large pullout on the west side of the highway, south of Chattanooga near Red Mountain Pass at 8:30 am.

For more info on ARSG, please visit http://animasriverstakeholders.org/

Field trip to remediated mine sites Sept. 16

The Animas River Stakeholders Group is sponsoring a a tour of remediated mine sites in the Mineral Creek and Cement Creek drainages on Friday, Sept. 16.

"We will also look at some of the issues around Gladstone," said coordinator Peter Bulter of Durango.

"We plan to meet at the large pullout on the west side of the highway, south of Chattanooga near Red Mountain Pass at 8:30 a.m."

The tour will be all day.

"Please let me know if you are interested in participating so we have a head count, and we may order lunches," Butler said. He can be reached at 970-259-0986.

"We will need 4-wheel drive vehicles, preferably with short wheelbases," Butler said. "We want to fill those 4-wheel drives to minimize the number of vehicles going on the tour."

Since 1994, the Animas River Stakeholders Group has worked to improve water quality in the Animas Basin through a collaborative approach involving all interested parties.

WE DELIVER: We mail (and e-mail) hundreds of newspapers all over the country each week.

OBI

Nicholas ?

Nicholas J. Heidy, former longtime Silverton and Durango resident, died Aug. 28, 2011, in Chandler, Ariz. He was 87.

Dr. Heidy was born in Chicago, on Dec. 8, 1923. He entered the U.S. Army in February 1943 and served for three years during World

War II. He was initially sent to Washington, D.C., for training, where he met his future wife, Helen Savich of Silverton, who worked at the Pentagon.

He became a member of the 3rd Combat Engineer's Battalion of the 24th Infantry Division serving in the Pacific Theater, specifically New Guinea, the Philippines, and the occupation of Japan after VJ Day. He earned a Purple Heart Medal in the retaking of Corregidor Island in the Philippines, a Presidential Unit Citation, and five bronze battle stars among other decorations.

He married Helen Savich in Silverton on Feb. 9, 1946. They returned to Chicago where he resumed his work in the electronics industry. In August 1948, he moved his wife and infant daughter, Sharon, to Silverton. In 1956, they moved to Durango.

He worked in several occupations including ore reduction milling and retail hardware, and leased/managed a service station in both towns. As soon as he had moved to Durango, he began taking night courses at Fort Lewis,

LETTERS, from Page 2

Fourth of July in Silverton was great

Editor;

Better late than never.

Thank you, Silverton community, for the great Fourth of July celebration. From beginning to end — the parade went smoothly, the flyover was well-timed, water fight great, so many afternoon activities and the fireworks dis-
